## 1 Project Overview

### About This Project

In this project, you will develop a comprehensive Business Continuity Plan (BCP) and Disaster Recovery Plan (DRP) for a fictional organization. You will conduct a Business Impact Analysis, define RPOs and RTOs, and create detailed recovery procedures. This project builds on the concepts from **Chapter 4**, focusing on business resilience and disaster preparedness.

## 2 Learning Objectives

Upon completion of this project, you will be able to:

1. Conduct a Business Impact Analysis (BIA) to identify critical functions
2. Define Recovery Point Objectives (RPO) and Recovery Time Objectives (RTO)
3. Develop a Business Continuity Plan (BCP) for maintaining operations
4. Create a Disaster Recovery Plan (DRP) for IT infrastructure recovery
5. Identify recovery strategies and resources

## 3 Scenario

### Organization Profile

You are the Business Continuity Manager for **HealthNet Solutions**, a healthcare technology company that provides electronic health record (EHR) systems to hospitals and clinics. The company has 300 employees and a data center hosting critical patient data. Recent disruptions (including a ransomware attack at a competitor) have prompted the executive team to invest in formal BCP and DRP capabilities.

## 4 Project Tasks

### 4.1 Task 1: Business Impact Analysis (BIA)

#### Task 1 Instructions

1. Identify all business functions and processes
2. Classify each function as critical, important, or non-essential
3. Determine the maximum tolerable downtime (MTD) for each function
4. Identify dependencies (systems, personnel, vendors)

### 4.2 Task 2: Define Recovery Objectives

#### Task 2 Instructions

1. For each critical function, define RPO and RTO
2. Justify the chosen objectives based on business impact
3. Consider cost-benefit trade-offs

### 4.3 Task 3: Develop the Business Continuity Plan (BCP)

#### Task 3 Instructions

Write the BCP document with the following sections:

- Purpose and scope
- BCP team roles and responsibilities
- Communication plan (internal and external)
- Business continuity strategies (alternative sites, work-from-home)
- Incident response and emergency procedures

### 4.4 Task 4: Develop the Disaster Recovery Plan (DRP)

#### Task 4 Instructions

Write the DRP document covering:

- IT recovery team
- Recovery site options (hot, warm, cold, cloud)
- Step-by-step recovery procedures for critical systems
- Data backup and restoration procedures
- Testing and maintenance schedule

## 5 Deliverables

You must submit a single professional document containing:

1. **Business Impact Analysis Report**
2. **Recovery Objectives (RPO/RTO) Table**
3. **Business Continuity Plan (BCP)**
4. **Disaster Recovery Plan (DRP)**
5. **Testing and Exercise Schedule**
6. **Contact and Resource Lists**

## 6 Evaluation Rubric

| headerblue!20 Criteria      | Weight | Description                                                  |
|-----------------------------|--------|--------------------------------------------------------------|
| Business Impact Analysis    | 20%    | Comprehensive identification and prioritization of functions |
| Recovery Objectives         | 15%    | Appropriate and justified RPO/RTO definitions                |
| BCP Completeness            | 25%    | All required sections are present and detailed               |
| DRP Completeness            | 25%    | Clear recovery procedures and resource identification        |
| Professionalism and Clarity | 10%    | Well-structured and well-written document                    |
| Critical Thinking           | 5%     | Evidence of thoughtful trade-off analysis                    |

## 7 Submission Guidelines

### Submission Requirements

- Submit a single PDF file via the course platform
- File name: `Project3_BCPDRP_YourName.pdf`
- Use the BCP/DRP template provided
- Include a title page and table of contents

## 8 Due Date and Late Policy

### Important Deadlines

- **Due Date:** \_\_\_\_\_ (Week 12)
- **Late Policy:** Submissions will be penalized 10% per day
- **Extensions:** Must be requested at least 48 hours in advance

## 9 Resources

- BCP/DRP template (provided)
- Textbook Chapter 4
- NIST SP 800-34 (Contingency Planning Guide)
- Industry best practices (e.g., DRJ, DRI International)
