Document Control

Version	Changes Made
1.0	Initial document creation

Role	Responsibility
CISO	Overall ownership
BCP Coordinator	Plan maintenance and testing
IT Recovery Team	Technical recovery execution
Business Unit Leads	Business continuity coordination

1 Introduction

1.1 Purpose

The purpose of this Business Continuity and Disaster Recovery Plan (BCP/DRP) is to:

- Ensure the continued operation of critical business functions
- Minimize the impact of disruptions on organizational operations
- Protect the safety and well-being of personnel
- Restore IT infrastructure and data after a disaster
- Maintain customer confidence and regulatory compliance

1.2 Scope

This plan applies to:

- All business functions and processes
- All IT infrastructure and systems
- All facilities and physical locations
- All personnel and stakeholders
- All vendors and partners

1.3 Objectives

1. Maintain critical business functions during disruptions
2. Protect human safety as the highest priority
3. Restore IT systems to full functionality
4. Minimize financial and reputational impact
5. Comply with regulatory requirements

1.4 Key Definitions

Term	Definition
Business Continuity	The capability to continue business operations during and after a disruption
Disaster Recovery	The process of restoring IT infrastructure and data after a disaster
RPO (Recovery Point Objective)	Maximum acceptable data loss (time-based)
RTO (Recovery Time Objective)	Maximum acceptable downtime
Critical Function	A business process essential for survival
Disaster	A major event causing significant damage requiring substantial recovery
Interruption	A minor event causing temporary disruption

2 Business Impact Analysis (BIA)

2.1 Executive Summary

Provide an overview of the BIA findings, including:

- Critical business functions identified
- Priority order for restoration
- Key dependencies and interconnections
- Overall business impact assessment

2.2 Critical Business Functions

Priority	Business Function	Owner	Max Downtime
1	Customer Support	_____	1 hour
2	Order Processing	_____	2 hours
3	Financial Systems	_____	4 hours
4	Supply Chain	_____	8 hours
5	HR Operations	_____	24 hours
6	Administrative Support	_____	48 hours

2.3 RPO and RTO Requirements

System/Application	Owner	RPO	RTO
Customer Database	IT Director	15 minutes	2 hours
Financial Systems	IT Director	15 minutes	2 hours
Email System	IT Director	4 hours	4 hours
Web Servers	IT Director	1 hour	1 hour
HR Database	IT Director	4 hours	8 hours
File Servers	IT Director	4 hours	4 hours
Network Infrastructure	IT Director	0 minutes	2 hours

Backup Systems	IT Director	0 minutes	4 hours
----------------	-------------	-----------	---------

2.4 Financial Impact Analysis

Business Function	Direct Loss per Hour	Indirect Loss per Hour
Customer Support	\$5,000	\$25,000 (reputation)
Order Processing	\$10,000	\$50,000 (lost sales)
Financial Systems	\$2,000	\$15,000 (compliance)
Supply Chain	\$5,000	\$30,000 (delays)

3 Risk Assessment

3.1 Threat Identification

Threat	Likelihood	Impact
Cyber Attack	High	Critical
Natural Disaster (Flood/Fire)	Medium	Critical
Power Outage	Medium	High
Hardware Failure	High	High
Human Error	High	Medium
Pandemic	Medium	High
Terrorism	Low	Critical

3.2 Scenario Planning

3.2.1 Scenario 1: Data Center Loss

- **Description:** Complete loss of primary data center
- **Causes:** Fire, flood, terrorist attack
- **Impact:** All IT systems unavailable
- **Recovery Strategy:** Failover to secondary site
- **Estimated Recovery Time:** 2-4 hours

3.2.2 Scenario 2: Major System Breach

- **Description:** Critical system compromised by ransomware
- **Causes:** Phishing, unpatched vulnerability
- **Impact:** Critical systems unavailable, data at risk
- **Recovery Strategy:** Incident response, restore from backup
- **Estimated Recovery Time:** 8-24 hours

3.2.3 Scenario 3: Building Loss

- **Description:** Complete loss of primary facility
- **Causes:** Fire, natural disaster
- **Impact:** Personnel and physical assets impacted
- **Recovery Strategy:** Alternate facility activation
- **Estimated Recovery Time:** 24-72 hours

4 Business Continuity Plan (BCP)

4.1 Incident Response

4.1.1 Emergency Response Procedures

1. Ensure safety of all personnel (evacuation, shelter-in-place)
2. Activate emergency notification system
3. Alert emergency services if required
4. Notify BCP Coordinator
5. Establish emergency command center

4.1.2 Crisis Communication

Crisis Communication Protocols

- **Internal Communications:** Emergency notification system, email, SMS
- **Executive Communications:** Weekly briefings, daily updates
- **Employee Communications:** Regular updates on status and actions
- **External Communications:** Press releases, customer notifications

4.2 Business Continuity Strategies

4.2.1 Alternate Work Locations

Location	Description	Capabilities
Secondary Office	Backup office space	Full IT connectivity
Work From Home	Remote work capabilities	VPN, collaboration tools
Hot Site	Fully equipped facility	All systems mirrored
Cold Site	Basic facility	Requires equipment setup
Mobile Command Center	Temporary facility	Communication equipment

4.2.2 Work Continuity Procedures

1. Activate alternate work location
2. Establish staff assignment and roles
3. Communicate work continuity procedures
4. Implement manual workarounds as needed
5. Monitor and adjust procedures as situation evolves

4.3 Key Business Processes

4.3.1 Critical Process Recovery

For each critical business function, document:

Business Function Recovery Form	
Business Function: _____	
Owner: _____	
Recovery Priority: _____	
Key Resources: _____	
Recovery Steps:	
1.	_____
2.	_____
3.	_____
Estimated Recovery Time: _____	

5 Disaster Recovery Plan (DRP)

5.1 Recovery Site Options

Type	Description	Cost/Time Trade-off
Hot Site	Fully equipped, current data copy	Highest cost, fastest
Warm Site	Equipment ready, no current data	Moderate cost, moderate time
Cold Site	Facility only, no equipment	Lowest cost, slowest
Cloud Recovery	Cloud-based infrastructure	Variable cost, fast

5.2 IT Infrastructure Recovery

5.2.1 Network Recovery

1. Activate alternate site network connections
2. Restore network configuration
3. Verify connectivity to all systems
4. Test access from remote locations

5.2.2 Server Recovery

1. Restore server from backup or image
2. Verify system integrity
3. Apply security patches
4. Test application functionality

5.2.3 Data Recovery

1. Restore data from most recent backup
2. Verify data integrity
3. Synchronize data across systems
4. Test data accessibility

5.3 Recovery Procedures by System

5.3.1 Customer Database

- **Recovery Method:** Restore from backup + transaction log
- **Alternate Method:** Cloud-based recovery
- **Backup Location:** Off-site backup + cloud
- **Verification:** Data integrity check, sample queries
- **Responsible:** IT Recovery Team

5.3.2 Financial Systems

- **Recovery Method:** Restore from backup + transaction log
- **Alternate Method:** Cloud-based recovery
- **Backup Location:** Off-site backup + cloud
- **Verification:** Data integrity check, transaction test
- **Responsible:** IT Recovery Team

5.3.3 Email System

- **Recovery Method:** Cloud-based recovery
- **Alternate Method:** On-premise restore
- **Backup Location:** Cloud backup
- **Verification:** Send/receive test
- **Responsible:** IT Recovery Team

5.4 Recovery Timeline

Recovery Timeline		
Timeframe	Activity	Responsible
0-1 hour	Incident declaration, team activation	Incident Commander
1-2 hours	Situation assessment, initial containment	Security Team
2-4 hours	Activate alternate site	IT Recovery Team
4-8 hours	Restore critical systems (Priority 1)	IT Recovery Team
8-12 hours	Restore secondary systems (Priority 2)	IT Recovery Team
12-24 hours	Full restoration, verification	IT Recovery Team
24-48 hours	Post-recovery monitoring	All teams

6 Plan Testing and Maintenance

6.1 Testing Types

Test Type	Description	Frequency
Checklist Test	Review of plan documents	Quarterly
Tabletop Exercise	Scenario walkthrough	Bi-annual
Simulation Test	Partial execution of plan	Annual
Full Exercise	Complete execution of plan	Annual

6.2 Test Schedule

- **Quarterly:** Plan review and update
- **Bi-Annually:** Tabletop exercise
- **Annually:** Full simulation exercise
- **Annually:** Comprehensive plan update

6.3 Plan Maintenance

The BCP/DRP shall be updated:

- When significant business changes occur
- When new systems are deployed
- When personnel changes occur
- Following a disaster or exercise
- At least annually
