

Fundamentals of Information Systems Security

Chapter 8 Quiz: Security Operations and Administration

Name: _____

Date: _____

Total Points: 100

Time Allowed: 30 Minutes

Instructions

- This quiz contains **20 questions** covering Chapter 8
- Answer all questions to the best of your ability
- Multiple choice questions have only one correct answer
- True/False questions should be marked T or F
- Short answer questions require concise, accurate responses

Section A: Multiple Choice (40 points)

1. (4 points) What is a Security Operations Center (SOC)?
 - A. A physical location where security administration occurs
 - B. A type of firewall
 - C. An encryption algorithm
 - D. A vulnerability scanner
2. (4 points) What does SIEM stand for?
 - A. Security Information and Event Management
 - B. Security Infrastructure and Enterprise Management
 - C. System Information and Event Monitoring
 - D. Security Intelligence and Event Management
3. (4 points) What is the principle of least privilege?
 - A. Giving users maximum access
 - B. Giving users the minimum access necessary to perform their job
 - C. Giving users access based on seniority
 - D. Giving users access to all resources
4. (4 points) What is separation of duties?
 - A. Breaking tasks into subtasks performed by different users
 - B. Allowing one user to perform all tasks
 - C. Separating IT from business operations

- D. Dividing physical security from logical security
5. (4 points) Which of the following is NOT a means to ensure compliance?
- A. Event logs
 - B. Compliance liaison
 - C. Remediation
 - D. Passwords
6. (4 points) What is the role of a compliance liaison?
- A. To ensure personnel are aware of and comply with policies
 - B. To develop new security technologies
 - C. To manage network infrastructure
 - D. To perform penetration testing
7. (4 points) Which RFC discusses Internet ethics?
- A. RFC 1087
 - B. RFC 1918
 - C. RFC 2821
 - D. RFC 5246
8. (4 points) What is a baseline in security?
- A. A documented minimum level of security configuration
 - B. The highest level of security
 - C. A type of malware
 - D. A network protocol
9. (4 points) What is the difference between a policy and a procedure?
- A. Policy is strategic; procedure is operational
 - B. Procedure is strategic; policy is operational
 - C. They are the same thing
 - D. Policy applies to IT; procedure applies to business
10. (4 points) What is the role of a Change Control Committee?
- A. To oversee all proposed changes to systems and networks
 - B. To manage passwords
 - C. To respond to security incidents
 - D. To classify data

Section B: True/False (20 points)

11. (2 points) Job rotation is a personnel security principle that helps prevent fraud.
- A. True
 - B. False
12. (2 points) Mandatory vacations are not an effective fraud detection method.

- A. True
 - B. False
13. (2 points) The Security Administration team is responsible for access control.
- A. True
 - B. False
14. (2 points) Event logs are not useful for investigating security incidents.
- A. True
 - B. False
15. (2 points) Outsourcing security monitoring has no disadvantages.
- A. True
 - B. False
16. (2 points) An SLA (Service Level Agreement) is a contract with a third-party vendor.
- A. True
 - B. False
17. (2 points) Change control management should be multidisciplinary.
- A. True
 - B. False
18. (2 points) The waterfall model is an example of agile development.
- A. True
 - B. False
19. (2 points) Certification is the process of reviewing a system to ensure it meets security requirements.
- A. True
 - B. False
20. (2 points) Accreditation is management's formal acceptance of risk.
- A. True
 - B. False

Section C: Short Answer (40 points)

21. (10 points) Explain the policy hierarchy: Policy, Standards, Procedures, and Guidelines. What is the purpose of each?

-
22. (10 points) Describe the personnel security principles: least privilege, need-to-know, separation of duties, job rotation, and mandatory vacations.
23. (10 points) What are the elements of a comprehensive BCP? List and explain each.
24. (10 points) Explain the difference between certification and accreditation in the context of system security.
